

FCC please reject NAB petition 04-160, this is a valuable and needed service no matter who provides it. Please don't jeopardize our safety because we chose to listen and subscribe to satellite radio. We deserve the opportunity to be informed as well as those who listen to public radio. Satellite radio has allowed me the latitude to listen to what I choose when I choose to and the NAB should not be able to regulate my selections and more importantly my safety. Thank You.
